SURGICAL SOLUTIONS

OR EFFICIENCY SELF-ASSESSMENT

Is Your OR Running as Efficiently as It Should Be?

Most ORs aren't struggling with one big issue. It's a dozen small breakdowns across staffing, reprocessing, and equipment. Let's fix it.

What We're Hearing from OR Teams

- **Turnover times keep slipping**
- **Trays aren't ready or arrive incomplete**
- **Reprocessing delays slow down cases**
- **New hires and travelers constantly cycling in**
- **Teams juggling operational issues on top of patient care**

Individually manageable.
Together, they create real strain.

Sound familiar?

Many of the people who bring this to us aren't executives.

They're nurses, coordinators, and managers who see the friction every day but don't have the resources to fix it alone.

Why OR Performance Breaks Down

Siloed Operations
Labor, equipment, and repair are managed separately

Fragmented Ownership
Multiple vendors, unclear accountability

Limited Visibility
Hard to identify root causes or track improvements

Is this happening in your OR? Rate your OR with the Efficiency Check on the next page to see.

How Surgical Solutions Is Different

- **Not consulting**
- **Not traditional staffing**
- **Not another vendor layer**

We place highly-trained teams inside your operation who own the work and are accountable for results.

Our Work Spans:

- Pre, intra, and post-procedural support
- Sterile processing leadership & staffing
- Endoscopy support services

We help hospitals achieve:

- More consistent turnover times
- Improved instrument readiness
- Better aligned staffing and workflows
- Reduced operational strain

SURGICAL SOLUTIONS

Quick OR Efficiency Check

Workflow & Throughput

- [ ] Turnover times are inconsistent or increasing
- [ ] Case delays tied to tray/instrument readiness
- [ ] SPD ↔ OR communication gaps
- [ ] Bottlenecks are hard to pinpoint

Instruments & Equipment

- [ ] Missing instruments or tray rework
- [ ] Inventory feels misaligned (too much or not enough)
- [ ] Repairs are reactive
- [ ] Multiple vendors without coordination

Staffing & Stability

- [ ] Frequent onboarding of new staff/travelers
- [ ] Training slows down productivity
- [ ] Staffing gaps affect consistency
- [ ] Clinical teams managing operational issues

Operational Alignment

- [ ] No clear ownership of outcomes
- [ ] Hard to measure real performance improvements
- [ ] Cost savings ≠ operational stability
- [ ] Known inefficiencies but no time/resources to fix

Your Results

- 🟢 0–3 checks: Mostly stable, with room for optimization
- 🟡 4–6 checks: Likely operational inefficiencies impacting performance
- 🔴 7+ checks: Significant strain from fragmented processes

Sharing This with Your Team

If you're seeing these challenges day-to-day, you're not alone.

Many improvements start when someone inside the OR brings these challenges forward.

This checklist can help start a conversation with leadership around:

- Workflow inefficiencies
- Staffing challenges
- Instrument and reprocessing gaps

We work alongside OR and SPD teams to stabilize and improve these areas by taking ownership of the work, not adding to it.

See How This Applies to Your OR

Even a short conversation can help identify where these challenges are showing up, and what's possible to improve.

See What This Looks Like in Practice

Explore real examples of how hospitals improved workflow, staffing stability, and instrument readiness.
